ONE TRUSTED PARTNER FOR EXCELLENCE

Our company provides technical solutions that ensure asset performance, operational reliability, and the creation of sustainable value through its services:

- Facilities Management
- Maintenance services
- Consulting & Technical Assistance
- Sourcing & Procurement

DGC is the unique partner capable of managing, maintaining, installing, advising, and supplying, while ensuring performance, compliance, and operational continuity.

WHAT WE DO?

Facilities Management

We provide technical FM services through monitoring, inspection, and periodic control contracts, ensuring compliance, availability, and performance of client assets.

- Asset operation monitoring
- Maintenance coordination & supervision
- Inspections and reporting
- Continuous improvement recommendations

Maintenance services

We deliver multi-sector preventive and corrective maintenance for :

- Buildings & facilities (HVAC, electrical, plumbing, refurbishment)
- Energy systems (generators, UPS, lighting, solar PV)
- Industrial facilities and utilities
- Heavy equipment
- Marine equipment

Our maintenance services are supported by diagnostics, detailed reports, and tailored maintenance plans.

Consulting & Technical Assistance

We propose high-level technical expertise through:

- Industrial unit installation and commissioning
- Technical diagnostics and audits
- Maintenance strategy development
- Energy efficiency studies
- Compliance preparation (HSE / Quality)
- Project supervision and commissioning support

Sourcing & Procurement

We ensure reliable sourcing and cost optimization through:

- Supplier and contractor qualification
- Spare parts and equipment sourcing
- Technical and commercial benchmarking
- Procurement and logistics coordination
- Total Cost of Ownership optimization

OUR EXPERTISE

Years of Experience *Powered by a Dedicated Professional Team*

Over the years, we have strengthened our capabilities to provide end-to-end engineering solutions tailored to each project.

From (mechanical, electrical and plumbing) and construction, fit-out to energy solutions, technical assistance, and the sale & rental of heavy equipment and machinery.

We also install, operate and maintain new industrial units. Driving performance, reliability and business continuity.
